Experience

Freelancer

Dowell Uxliving Lab

(remote, London, UK)

09/2023 - Current

- Main frontend developer responsible for designing, developing and maintaining Dowell Uxliving lab microservice applications, using the latest technologies of **React, Javascript, Typescript, Redux and TailwindCss**.
- Spearheaded the development of dynamic and responsive user interfaces using **React** and **TypeScript**.
- Orchestrated efficient state management through **React hooks** and **Redux**, ensuring seamless data flow.
- Masterfully integrated **APIs** using **Axios**, optimizing data retrieval and enhancing overall system performance.
- Innovated **user-centric** features, including dynamic UI updates, **range selection**, and **search functionalities**.
- Crafted visually appealing and **responsive designs** with a modern touch, leveraging the power of **Tailwind CSS**.
- Engineered robust **error handling** mechanisms and employed toast notifications for effective user feedback.
- Showcased expertise in **TypeScript**, introducing type safety and elevating the overall code quality.
- Successfully communicated with **external APIs**, ensuring seamless interactions and thorough documentation.
- Implemented a secure session management system using **localStorage**, enhancing **user authentication**.
- Pioneered language translation functionality, fostering inclusivity through the **Google Translate API**.
- Demonstrated **collaborative prowess** by seamlessly integrating with **Redux** and managing shared state.
- Applied **useEffect** strategically for optimal component **lifecycle management** and **peak performance**.
- Showcased adept problem-solving skills, especially in **handling translation errors** and **API challenges**.
- Ensured **responsiveness** and **adaptability**, creating components tailored for **diverse screen sizes**.
- Demonstrated a commitment to continuous learning, staying ahead with **new technologies** and **best practices**.

Freelancer

Upwork

(Online Marketplace)

10/2023 - Current

- completed multiple jobs on Upwork and earned over **\$600**. Check me @[Qavyum Ibrahim](#).

Education

Diploma in Software Engineering

Aptech Computer Education

Quarry, abk, Ogun

08/2019 - 12/2021

- Major in Software and Web Engineering

Projects

- FALPPYFLOP**: Creator of a 2D mobile strategy bird game (React and Tailwind, Mobile Responsive). Currently played by family and friends. Link to [flappyflop](#) (07/2020).

Mentorship

- Computer Science Tutor**: Programming | Data Structure and Algorithms with Javascript (01/2021 - 04/2022)

Awards
